# QUEBEC PRECIOUS METALS CORPORATION

## James Bay, Quebec-Focused Gold Exploration

TSX.V: CJC  
[qpmcorp.ca](http://qpmcorp.ca)

- Large 100% owned, highly prospective land package (874 km<sup>2</sup>)
- One of the most active companies in the region; aiming to rapidly advance to the mineral resource estimate stage
- Ongoing drill program at the Sakami Project, yielding significant grades and well-defined, drill-ready targets
- Newmont Goldcorp Corporation is a strategic investor holding 14% and operating the Éléonore gold mine just 90km away

Normand Champigny,  
CEO, will be  
presenting on  
Friday, May 24th  
at 10:50am

FRIDAY MAY 24 2019

FRIDAY

## 8:45 REGISTRATION & BREAKFAST

9:50 Eric Coffin — Introduction to the March Metals Investor Forum 2019

## 10:00 Gwen Preston, *Resource Maven*

10:20	Compass Gold Corp.	TSX-V: CVB
10:30	EMX Royalty Corp.	TSX-V: EMX
10:40	Tudor Gold Corp.	TSX-V: TUD
10:50	Quebec Precious Metals Corp.	TSX-V: CJC

11:00–11:30 Q&A Session: Gwen Preston | Bowden Room

## 11:00 MORNING COFFEE BREAK

## 11:30 Joe Mazumdar, *Exploration Insights*

11:50	Mirasol Resources Ltd.	TSX-V: MRZ
12:00	Regulus Resources Inc.	TSX-V: REG
12:10	Japan Gold Corp.	TSX-V: JG
12:20	Chakana Copper Corp.	TSX-V: PERU

12:30–1:00 Q&A Session: Joe Mazumdar | Bowden Room

## 12:30 LUNCH BREAK

## 1:30 Eric Coffin, *HRA Advisories*

1:50	Aston Bay Holdings Ltd.	TSX-V: BAY
2:00	Northern Shield Resources Inc.	TSX-V: NRN
2:10	Pan Global Resources Inc.	TSX-V: PGZ
2:20	Vendetta Mining Corp.	TSX-V: VTT

2:30–3:00 Q&A Session: Eric Coffin | Bowden Room

## 2:30 AFTERNOON COFFEE BREAK

3:00 Special Guest Speaker: Dave Forest, *The International Speculator*

## 3:20 Jordan Roy-Byrne, *The Daily Gold*

3:40	Minera Alamos Inc.	TSX-V: MAI
3:50	Triumph Gold Corp.	TSX-V: TIG
4:00	Maverix Metals Inc.	TSX-V: MMX

4:10–4:40 Q&A Session: Jordan Roy-Byrne | Bowden Room

## KEYNOTE SPEAKERS

### ERIC COFFIN

PUBLISHER,  
HRA ADVISORIES

Eric Coffin has been publishing *HRA Advisories* for 20 years; this has given him the experience to identify market trends early and to understand exactly what a company needs to be successful. Thirty years of mining sector experience, from joint ownership of an exploration consultancy to sector wide data analysis and company specific advising on M&A, project selection, financing and market awareness give Eric the background to know what works.

He has been interviewed by and contributed to numerous international websites and news services providing commentary on finance, economics, markets and individual companies and exploration regions. Eric regularly speaks at a number of North American gold and resource conferences. He was one of the first analysts (along with David) to point out the disastrous effects of gold hedging and gold loan capital financing (1997) and to predict the start of the secular commodity bull market in commodities based on the movement of the US Dollar (2001) and the acceleration of growth in Asia and India.

#### Q&A Session: Eric Coffin

Friday, May 24 2019  
2:30–3:00

Aston Bay Holdings Ltd.  
Northern Shield Resources Inc.  
Pan Global Resources Inc.  
Vendetta Mining Corp.

### GWEN PRESTON

PUBLISHER,  
RESOURCE MAVEN

Gwen Preston launched *Resource Maven* after spending almost a decade writing about resource investing, most of it as a senior writer at *The Northern Miner*.

She understands which projects and pieces of news matter. She understands what it takes for a project to advance along the exploration-development-production path and what opportunities each stage offers.

She knows how the metals markets work, alone and within the global economy, and how to profit from commodity cycles.

Resources are Gwen's world and she seeks to pass that knowledge on to others. She is a scientist and journalist who has spent the last decade focused exclusively on metals and mining. Through investment experience, site visits around the world, endless self-education about economics and geology, and a strong network of friends and colleagues in the sector, she either knows or can figure out the answer to almost any metals and mining question.

#### Q&A Session: Gwen Preston

Friday, May 24 2019 11:00–11:30

Compass Gold Corp.  
EMX Royalty Corp.  
Tudor Gold Corp.  
Quebec Precious Metals Corp.

Saturday, May 25 2019 2:30–3:00

Nighthawk Gold Corp.  
Tinka Resources Ltd.  
IsoEnergy Ltd.

### JAY TAYLOR

EDITOR, J TAYLOR'S GOLD,  
ENERGY & TECH STOCKS

Jay Taylor is the editor of *J Taylor's Gold, Energy & Tech Stocks* newsletter and host of the web-based radio show "*Turning Hard Times into Good Times*." In 1981 he began publishing his gold-orientated newsletter. His continuing interest in gold mining prompted him to study geology, supplementing his MBA in Finance and Investments. Throughout his career Mr. Taylor worked as a banker, including holding a job in the Mining and Metals Group of ING Barings in New York. In 1997 he resigned from ING Barings to devote himself full time to researching mining and technology stocks, writing his newsletter and assisting companies in raising venture capital.

#### Q&A Session: Jay Taylor

Saturday May 25 2019  
12:40–1:10

Radisson Mining Resources Inc.  
StrikePoint Gold Inc.  
Rise Gold Corp.  
GFG Resources Inc.  
Goldsources Mines Inc.

## JOHN KAISER

FOUNDER,  
KAISER RESEARCH ONLINE

John Kaiser is the founder of *Kaiser Research Online*, an information portal covering the Canadian publicly listed resource sector, and the publisher of his Spec Value Hunter and Bottom-Fish recommendations. His analysis focuses on the four key narratives that drive the resource sector. John Kaiser is an independent analyst based in the San Francisco area who has covered the junior resource sector since 1983. After a decade working as a research director in Vancouver he left the brokerage industry in 1994 to launch *Kaiser Research Online* and create the “rational speculation model” as a tool to evaluate the speculative value of exploration projects. *Kaiser Research Online* is a subscription service that publishes his analysis, provides searchable information on over 1500 Canadian listed mining and exploration companies, and tracks trends within the junior sector and their relationship to macro trends.

### Q&A Session: John Kaiser

Saturday May 25 2019  
11:10–11:40

Zephyr Minerals Ltd.  
92 Resources Corp.

## GREG MCCOACH

THE MINING SPECULATOR

Greg McCoach is an ardent student of history and entrepreneur who has successfully started and run multiple businesses over the past 37 years. During the last 18 of those years, he has written his widely-followed newsletter, *The Mining Speculator* in search of exponential gains within the junior mining sector.

He is also founder and CEO of AmeriGold.com, a bullion dealer in its 19th year. He has appeared on national news channels and is a popular speaker at both private and public conferences.

Mr. McCoach’s philosophy is one of limited government, free markets, unrestricted freedom of speech and thought, and a celebration and defense of individual liberty.

### Q&A Session: Greg McCoach

Saturday May 25 2019  
11:10–11:40

First Vanadium Corp.

## JOE MAZUMDAR

ECONOMIC GEOLOGIST,  
EXPLORATION INSIGHTS

Joe Mazumdar is an Economic Geologist/Analyst at *Exploration Insights*. Prior to that he was a senior mining analyst at Haywood Securities, then Canaccord Genuity. His work experience includes Director of Strategic Planning, Corporate Development at Newmont and Senior Market Analyst/Trader at Phelps Dodge. Mazumdar also worked in technical roles for IAMGOLD in Ecuador, North Minerals in Argentina/Chile and Peru, RTZ Mining and Exploration in Argentina, Chile, Peru and Ecuador and MIM Exploration and Mining in Queensland, Australia, among others. Mazumdar has a Bachelor of Science in Geology from the University of Alberta, a Master of Science in Geology and Mining from James Cook University and a Master of Science in Mineral Economics from the Colorado School of Mines.

### Q&A Session: Joe Mazumdar

Friday, May 24 2019  
12:30–1:00

Mirasol Resources Ltd.  
Regulus Resources Inc.  
Japan Gold Corp.  
Chakana Copper Corp.

## KEYNOTE SPEAKERS

## SPECIAL GUEST SPEAKER

### JORDAN ROY-BYRNE

EDITOR & PUBLISHER,  
THE DAILY GOLD PREMIUM

Jordan Roy-Byrne, CMT, MFTA is a Chartered Market Technician and Master of Financial Technical Analysis who is a member of the Market Technicians Association. He is the editor and publisher of *TheDailyGold Premium*, a publication which emphasizes market timing and stock selection for precious metals investors. He is also the author of the 2015 book, *The Coming Renewal of Gold's Secular Bull Market* which is available for free at [TheDailyGold.com/Book](http://TheDailyGold.com/Book).

Jordan's work has been featured in CNBC, Barrons, Financial Times Alphaville, Kitco and Yahoo Finance. He has been quoted in Barron's. Jordan has been a speaker at the following conferences: PDAC, Cambridge House and the Metals Investor Forum and his website *TheDailyGold.com* was recently named one of the top 50 Investment Blogs by DailyReckoning.

#### Q&A Session: Jordan Roy-Byrne

Friday May 24 2019  
4:10–4:40

Minera Alamos Inc.  
Triumph Gold Corp.  
Maverix Metals Inc.

### DAVE FOREST

SENIOR ANALYST,  
THE INTERNATIONAL SPECULATOR

David Forest is chief investment analyst for the *International Speculator* and has been successfully founding and advancing resource projects for nearly two decades. As a co-founder and Chief Operating Officer of Sunward Resources, he was directly involved in raising \$80 million in equity financing and oversaw the development of a 10-million-ounce gold resource at the Titiribi gold-copper porphyry project, which was sold to NovaCopper (now Trilogy Metals) in 2015. Mr. Forest also founded and serves as Managing Director of N-Side Mining Technology Pte Limited, a firm developing global mineral exploration projects using proprietary LongWave InfraRed (LWIR) satellite imaging. He holds a B.Sc. (Honors) in Geology from the University of Alberta.

# NEWSLETTER WRITER COMMENTARY ON EXHIBITING COMPANIES (IN ORDER OF PRESENTATION)

## Compass Gold Corp.

TSX-V: CVB      ► compassgoldcorp.com  
Phone: 416 605 5120      Email: info@compassgoldcorp.com

Compass Gold Corp. is a public mineral exploration company incorporated in Ontario and a Tier 2 issuer on the TSX Venture Exchange (TSX-V:

CVB). Through the acquisition in late-2017 of Mali Gold Exploration Pty Ltd. and its Malian subsidiaries, Compass holds gold exploration permits in Mali that comprise the Sikasso Property. Today, these permits cover three sites in southern Mali with a combined land holding of 854 sq.km. The Sikasso Property is located in the same region as several multi-million ounce gold projects, including Morila, Syama, Kalana and Kodiéran. The Company's Mali-based technical team, led in the field by Dr. Madani Diallo and under the supervision of Dr. Sandy Archibald, P. Geo, is executing an ongoing exploration program, including the first-ever bedrock drilling conducted on the property.

*"Compass has a list of prospective gold projects in Mali. Why would I bet on early-stage gold exploration in Mali? Because (1) this is the team that founded IAMGOLD and built it into a \$6-billion company based in large part on discoveries they made and then built into mines in Mali, (2) the team has already shown that its thorough exploration approach works with a high-grade gold discovery, (3) they have multiple targets that are all part of a big picture geologic theory based on extensive evidence, and (4) Compass has only 30 million shares outstanding, two-thirds of which are with management and insiders. Results from the next round of drilling at the high-grade discovery are pending."*

– Gwen Preston, Resource Maven

## EMX Royalty Corp.

TSX-V: EMX; NYSE AMERICAN: EMX      ► emxroyalty.com  
Phone: 604 688 6390      Email: info@emxroyalty.com

EMX Royalty Corporation has a long-standing track record of success

in exploration discovery, royalty generation, royalty acquisition, and strategic investments. Our diversified, three pronged business approach provides exposure to multiple upside opportunities, while minimizing the impact on EMX's treasury. EMX's business model is designed to efficiently manage the risks inherent to the minerals exploration and mining industry.

*"For 16 years EMX's strong technical team has made grassroots discoveries around the world while the company's savvy markets team has inked deals to partner projects, buy royalties, and make*

*strategic investments. One of those strategic investments just put \$89 million in EMX's bank account, a clear reminder that this group is very good at deploying capital. With more capital now on hand than the company has raised and earned over its lifespan, EMX is in a stronger position than ever and I'm eager to see how they use this war chest to create clear, long-term value for shareholders."*

– Gwen Preston, Resource Maven

## Tudor Gold Corp.

TSX-V: TUD; Frankfurt: TUC.F      ► tudor-gold.com  
Phone: 604 559 8092      Email: info@tudor-gold.com

**TUDOR GOLD**

Tudor Gold Corp. is a very promising exploration company focused on precious and base metal exploration properties in the province of British Columbia, Canada. The company has 4 projects, all located in the famous 'Golden Triangle', an area that hosts multiple past producing mines, two new mines and several large world-class deposits that are approaching potential development. The Company has a 60% interest in the Electrum and Treaty Creek projects, with additional 100% owned projects, or earn-in options the Crown project and the Eskay North Project. The company's flagship 'Treaty Creek' project is adjacent to world-class projects such as the 'KSM' project (49.2 million ounces Gold in the M+I category) of Seabridge Gold and the 'Snowfield' project (25.9 million ounces Gold in M+I category) of Pretium Resources.

*"Tudor is a well funded, tightly held company with an enticing project called Treaty Creek. Treaty is next door to Pretium Resources' high-grade Valley of the Kings mine, it is only 25 km from a highway, and it has seen 69 historic holes that returned some very long gold-copper intercepts. Because of all this Tudor attracted a lot of attention when it debuted in 2016 but insufficient geologic expertise meant the company stumbled in its first go. Now Ken Konkin, a very good geologist who defined the high grade at Pretium, is leading the charge with new theories on finding high grade while defining a big porphyry at Treaty Creek."*

– Gwen Preston, Resource Maven

---

## Quebec Precious Metals Corp.

TSX-V: CJC; CJCFF; YXEP.BE ▶ [qpmcorp.ca/en](http://qpmcorp.ca/en)

Phone: 514 871 1258

### QUEBEC PRECIOUS METALS CORPORATION

QPM is a new gold explorer with a large

land position in the highly-prospective Eeyou Istchee James Bay region, Quebec, near Goldcorp's Éléonore gold mine. QPM has assembled a district-scale land package (909 km<sup>2</sup>) in the underexplored region of the Eeyou Istchee James Bay territory in northern Quebec located near the town of Radisson. The region hosts the Éléonore gold mine discovered by Virginia Gold Mines in 2004 and operated by GoldCorp. Inc. since 2014. The flagship project is Sakami and QPM is advancing it to the resource estimate stage by the end of 2019. Existing infrastructure facilitates exploration at a reasonable cost all year round.

*"Quebec Precious Metals is still a fairly new entity, the result of a three-way merger focused on the Sakami project. Sakami is in Quebec's James Bay, near the successful Eleonore mine, and the gold zone identified to date looks a lot like Eleonore's Roberto deposit. Eleonore needs more ore, owner Goldcorp-Newmont already took a strategic position in CJC, and the market has yet to realize that Sakami will likely produce an initial resource of several million high-grade ounces in the near term."*

– **Gwen Preston**, Resource Maven

---

## Mirasol Resources

TSX-V: MRZ; OTCQB: MRZLF ▶ [mirasolresources.com](http://mirasolresources.com)

Phone: 604 602 9989 Email: [contact@mirasolresources.com](mailto:contact@mirasolresources.com)

Our Vision: To be the leading Project Generator in the Americas, delivering real wealth creation to our shareholders through the discovery of world-class mineral deposits. Our

Mission: To make a significant discovery that will drive value creation, we must lead and not follow. We believe that the combination of our innovative geoscience, our exploration capability and our sustainable business model applied to world-class mineral belts, will lead us to the next discovery. Our mission is to be the Project Generator that investors choose, that major mining companies select to partner with and that our peers strive to emulate.

*"A Vancouver-based prospect generator focused on the southern cone of South America (Chile and Argentina) has fallen ~40% since the announcement of the termination of a pair of joint ventures (JVs) with OceanaGold (OGC.T, OGC.ASX) in Argentina. The company has in its favor a low enterprise value which includes over C\$20 million in working capital and near-term catalysts including drilling news from the Gorbea and Altazor joint ventures (JVs) in Chile. These two projects could turn into significant gold-copper systems similar to the neighboring Salares*

*Norte gold-silver project, which hosts a global open pit amenable resource (Indicated plus Inferred) of 3.9 million ounces of gold grading 4.7 grams per tonne with 43 million ounces of silver grading over 50 grams per tonne. I still believe in the potential of the company's near term catalysts based on the assets in Chile, but, to reclaim investor confidence, the new management team needs to demonstrate its capacity to develop new joint venture targets aimed at major producers."*

– **Joe Mazumdar**, Exploration Insights

---

## Regulus Resources

TSX-V: REG ▶ [regulusresources.com](http://regulusresources.com)

Phone: 604 685 6800 Email: [info@regulusresources.com](mailto:info@regulusresources.com)

Regulus Resources Inc. is a Canadian exploration company formed in December 2010 under the directorship of the former management of Antares

Minerals Inc. (TSX-V: ANM): John E. Black, Dr. Kevin B. Heather and Mark Wayne. Regulus was created through the spin-out of the Rio Grande Cu-Au project in Argentina at the conclusion of the sale of Antares to First Quantum Minerals (TSX: FM, UK: FQM) for approximately C\$650 million, primarily for the giant Haquira Cu-Mo-Au deposit in Peru.

*"The Peru-focused copper-gold explorer is advancing the AntaKori project, which hosts a global resource (M+I plus Inferred) of ~8 billion pounds grading 0.7% copper equivalent on a complicated land package, which has been cobbled together by Regulus. Owning REG provides me with copper exposure to a potentially large copper-gold system at AntaKori linked to the potential porphyry and skarn upside outside the known resource with less arsenic than the majority of the current resource. The near term plan is to drill another 20,000 to 25,000 meters to expand the footprint of the system; however, drilling to the north requires permitting, which may take until late summer to early fall of 2019 (Peru's winter/spring)."*

– **Joe Mazumdar**, Exploration Insights

---

## Japan Gold Corp.

TSX-V: JG; OTCQB: JGLDF ▶ [japangold.com](http://japangold.com)

Phone: 778 725 1491

Email: [info@japangold.com](mailto:info@japangold.com)

Japan Gold Corp. is a Canadian mineral exploration company leveraging its first-mover advantage as the first foreign exploration company to focus entirely on gold and copper-gold opportunities in Japan. The Company holds a portfolio of 12 Gold Projects which cover areas with known gold occurrences, a history of mining and are prospective for high-grade epithermal gold mineralization. The Company also holds a portfolio of 5 gold-bearing Lithocap Projects which could indicate the presence of porphyry min-

eralization. The main Japan islands of Hokkaido, Honshu and Kyushu have at least 6 distinct epithermal gold provinces hosting greater than 70 historically producing gold mines, including five +1 million ounce deposits. Still in production today, the Hishikari mine on the island of Kyushu is one of the world's highest-grade gold mines, and has produced in excess of 7.6 million ounces of gold between 1985-2018 at average gold grades of 30-40 g/t. Japan Gold's exploration licenses and applications cover at least 42 historically producing mines and workings. Japan Gold's leadership team has decades of resource industry and business experience, and the Company has recruited geologists and technical advisors with experience exploring and operating in Japan.

*"A Vancouver-based gold and copper exploration company that has staked over 700 square kilometers of prospective land in Japan. Twelve of its 17 projects are focused on precious-metal-bearing low sulfidation (LS) epithermal veins, and the remainder (5) are centered on lithocap targets, which may represent the tops of copper-gold porphyry systems. The company is currently embarking on a >5,000-meter drill program, not only in northern Hokkaido but also in Kyushu, where Hishikari, which produces ~200,000 ounces a year grading about an ounce per tonne is actually located. At this point, I don't think Japan is ready for large open pit mines; however, underground projects are doable and currently exist, with the majority of the gold ores being sent to smelters as silica flux. That said, I don't think that companies like Newmont GoldCorp. (NEM.NYSE, NGT.T) would consider investing in exploration companies operating in Japan if the potential for the operations to employ cyanide to extract the gold at the site did not exist."*

- Joe Mazumdar, Exploration Insights

## Chakana Copper Corp.

TSX-V:PERU; OTC:CHKKF; FRA:1ZX

► chakanacopper.com Email: info@chakanacopper.com

Chakana Copper Corp. is a Canadian based minerals exploration company and through its wholly owned Peruvian subsidiary, Chakana Resources S.A.C., is currently advancing the Soledad project near Aija, in the Ancash region of the highly prolific Cordillera Negra mountain range of Peru.

*"The Peru-focused copper-gold explorer recently announced a significant strategic investment of C\$8.0 million by South Africa-based major gold producer Gold Fields (GFI.NYSE). The junior has completed 25,211 meters of drilling in 94 drill holes in four of the 17 confirmed breccia pipes on its Soledad project and is planning another 20,000-meter drill program (120 platforms) - which could be expanded if necessary, thanks to Gold Fields' capital injection - once a highly anticipated drill permit is approved. I continue to hold Chakana in anticipation of the delineation of additional high-grade breccia pipes that may contribute positively to the project's maiden resource."*

- Joe Mazumdar, Exploration Insights

## Aston Bay Holdings Ltd.

TSX-V: BAY; OTCQB: ATBHF

► astonbayholdings.com Phone: 514 982 7555  
Email: sofia.harquail@astonbayholdings.com

Aston Bay is exploring for large, high-grade, copper, zinc and precious metal deposits in Nunavut, Canada and Virginia, USA. The Company is led by CEO Thomas Ullrich with exploration directed by Chief Geologist Dr. David Broughton, the award-winning co-discoverer of Kamoakakula and Flatreef, in conjunction with the Company's advisor, Don Taylor, the 2018 Thayler Lindley Award winner for his discovery of the Taylor Pb-Zn-Ag Deposit in Arizona.

*"Aston Bay has two regional scale exploration plays, the sedimentary copper Storm project on Somerset Island in the NWT and the Jack's Fork orogenic gold/VMS play in the state of Virginia. BAY has been prioritizing target areas and signing land agreements in Virginia and began its first exploration program and the Buckingham high grade gold target. It recently completed its first drill program with drill results immanent. More target areas are being acquired, all of them on fee simple land that allows for immediate access and exploration activity. BAY will be exploring and reporting from several high impact project areas in VA and the NWT through 2019."*

- Eric Coffin, HRA Advisories

## Northern Shield Resources Inc.

TSX-V: NRN

► northern-shield.com

Phone: 613 232 0459 Email: info@northern-shield.com

NORTHERNSHIELD  
RESOURCES INC.

Northern Shield Resources Inc. is a Canadian-based company known for generating high-quality Ni-Cu-PGE exploration targets and executing grass roots exploration through a model driven approach. Utilizing this method through its wholly-owned subsidiary, Seabourne Resources Inc., it has recently discovered a large low sulphidation epithermal gold system in Nova Scotia, the first of its kind in the province.

*"Northern Shield controls several epithermal gold projects in Nova Scotia and Quebec and Ni-PGM projects in northern Quebec. It is currently focused on advancing the Shot Rock project, NRN's low sulphidation epithermal gold discovery, the first of its kind in the region. Shot Rock is advancing rapidly and is already proving to have very large scale. Current surface work detailing the kilometres long set of veins and stockwork systems should lead to a maiden drill program later this summer. Shot Rock's status as a large, totally new and totally open mineralized system makes this a potentially very high impact project."*

- Eric Coffin, HRA Advisories

---

## Pan Global Resources Inc.

TSX-V: PGZ; OTC: PGNRF

► panglobalresources.com Phone: 604 689 9930

Email: investors@panglobalresources.com

Pan Global Resources Inc. is a Vancouver-based junior resource company actively engaged in base and precious metal exploration in Spain. Pan Global's Board of Directors and Leadership Team bring decades of knowledge and global exploration experience to the Company. The team has led their respective organizations to successful exit strategies or into production, generating hundreds of millions in shareholder value.

*"Pan Global Resources Aguilas project in Spain protects two large mineral trends, one lead-zinc-silver, one iron-oxide copper gold. Both have generated strong targets that PGZ is still in the early stages of testing. PGZ will soon be drill testing the Escacena project in the Iberian Pyrite Belt, the world's premier VMS camp. PGZ is about to start drill testing two large gravity anomalies there. Gravity anomaly testing has been the primary method of VMS deposit discovery in the Belt. The large Escacena anomalies are among the few still untested by drilling. They present near-term, large scale discovery potential."*

– Eric Coffin, HRA Advisories

---

## Vendetta Mining Corp.

TSX-V: VTT

► vendettaminingcorp.com

Phone: 604 484 7855 Email: info@vendettaminingcorp.com

Vendetta Mining Corp. is a Canadian junior exploration company engaged in acquiring, exploring, and developing mineral properties. Vendetta controls the Pegmont lead-zinc resource, strategically located in the heart of the world's most important lead-zinc belt in Queensland Australia.

*"Vendetta Mining has been focused on the Pegmont lead-zinc project in Australia for the last three years, more than doubling the resource and undertaking a maiden Preliminary Economic Assessment for the project. The PEA yielded strong economics, thanks to the favorable location, excellent logistics and good grade. VTT just completed it's earn-in at Pegmont, giving it a 100% interest in the project. This allows Vendetta to pursue several potential outcomes for Pegmont, including sale to a larger company, development in concert with owners of one of the near-by mills or development to production."*

## Minera Alamos

TSX-V: MAI

► mineraalamos.com

Phone: 416 306 0990

Email: info@mineraalamos.com

Minera Alamos is an advanced-stage exploration and development company with a growing portfolio of high-quality Mexican assets, including the La Fortuna open pit gold project in Durango with positive PEA completed (permits awaiting issuance) and the Santana open pit heap-leach development project in Sonora with test mining and processing completed (permits pending). The Company anticipates making a construction decision at Santana in 2019 and advancing both Santana and Fortuna in to production in 2019–2020.

*"Minera Alamos owns three small but high margin potential projects in Mexico with immediate production potential. Through their relationship with Osisko Gold Royalties, the company will be funded to build these mines and through internal cash flow, increase production. The management team "did it before" by building the El Castillo mine with only C\$7M, which later was acquired for a premium. If the company executes and the Gold price remains above \$1200/oz, we see 3x to 4x potential over the next few years. If gold enters a bull market, the potential is much greater."*

– Jordan Roy-Byrne, The Daily Gold

---

## Triumph Gold Corp.

TSX-V: TIG

► triumphgoldcorp.com

Phone: 604 893 8757

Email: info@triumphgoldcorp.com

Triumph Gold Corp. is a mineral exploration company currently focussed on its 100% owned Freegold Mountain Project, Yukon. This road accessible property is located in the Dawson Range gold-copper belt, host to the Casino Copper deposit, the Coffee gold deposit and the Klaza gold prospect. Triumph Gold Corp. has a leadership team with a collective history of exploration success as well as capital raising ability.

*"Triumph Gold is a junior exploration company, exploring its massive Freegold Mountain project which is located in the Yukon and enjoys the best infrastructure in the region. A new management team came in years ago, recapitalized the company and secured backing from GoldCorp. Last year Triumph discovered significant porphyry mineralization in the Blue Sky zone but that pales in comparison to the potential of the drill targets this season. The company has outlined a 6km long soil and geophysical anomaly that carries evidence of being underlain by porphyry mineralization. Speculators should be keen on this situation. The stock is trading around strong support while the company is soon to drill some very high potential targets."*

– Jordan Roy-Byrne, The Daily Gold

---

## Maverix Metals

TSX-V: MMX; OTCQX: MACIF ▶ maverixmetals.com  
Phone: 604 449 9290 Email: info@maverixmetals.com

**MAVERIX**  
METALS INC.

Maverix Metals provides upfront payments to mine operators in need of capital in return for a percentage of the future revenue generated from the mine (a royalty), or the right to either purchase all, or a fixed percentage of, future precious metal production for a pre-determined price (a stream). These royalty and streaming agreements provide exposure to precious metals price appreciation, fixed operating costs and exploration and expansion upside without the associated capital, operating and environmental costs. In just over two years Maverix has acquired 3 major royalty portfolios from senior mining companies and along with a number of additional bolt on acquisitions has grown its portfolio to 80 total royalties and streams. With its experienced and knowledgeable leadership team, support from key stakeholders and track record of adding value through acquisitions, Maverix is well positioned to continue its growth.

*“The royalty business is a considerably lower risk way to get exposure to Gold or Silver. A royalty company will be successful if they can raise the capital necessary to acquire royalties, generate cash flow and grow their portfolio of royalties. Maverix Metals has both the credibility and the capital to be a long-term player in the royalty space. They grew attributable production by 75% last year and now have over \$60M in capital to continue that growth. They also count Newmont, Pan American Silver and Gold Fields as shareholders.”*

– Jordan Roy-Byrne, *The Daily Gold*

---

## Zephyr Minerals Ltd.

TSX-V:ZFR; OTC:ZPHYF ▶ zephyrminerals.com  
Phone: 902 446 4189 Email: info@zephyrminerals.com

Zephyr Minerals Ltd. holds a 100% interest in the Dawson-Green Mountain project in Colorado, USA, approximately 9.5 km southwest of Canon City in Fremont County. The eastern claims of Dawson-Green Mountain include an advanced gold project with excellent exploration potential, and the western claims host potential for a Broken Hill-type zinc, lead and silver discovery.

*“Zephyr Minerals has a two-prong exploration strategy at its Dawson-Green Mountain project in Colorado. Since 2012 Zephyr has focused on outlining high grade gold lenses in an effort to support a small scale standalone mine or, if it can achieve a 500,000 oz resource threshold, direct ship to Newmont’s Cripple Creek facility. Topography and the dip of the structure limit the depth surface drilling can test, so Zephyr expanded the project in 2018 to include the Green Mountain segment. This effort led to*

*the recognition that the El Plomo segment which has a narrow horizon of outcropping zinc-lead-silver mineralization has the potential to host a large, relatively shallow Broken-Hill type deposit. The Zephyr team led by CEO Loren Komperdo will test the Broken-Hill hypothesis in 2018 while continuing the high grade gold exploration strategy.”*

– John Kaiser, *Kaiser Research Online*

---

## 92 Resources Corp.

TSX-V: NTY; FSE: R9G2; OTCB: RGDCF  
▶ 92resources.com Phone: 778 945 2950  
Email: info@92resources.com

92 Resources Corp. is a junior mineral exploration company focused on acquiring and advancing strategic and prospective properties that position it strongly for the world’s continuing shift to high tech and green technologies including base and precious metals, and lithium.

*“92 Resources is a lithium junior with a focus on pegmatite prospects in the James Bay region of Quebec, one of which was surrounded by a staking rush initiated by Midland Exploration Ltd. after it made its Mythril copper discovery in late 2018. Despite two decades of grassroots exploration the James Bay region proved unpromising with regard to copper, but Mythril appears to be a new type of copper system invisible to past exploration strategy. Early indication is that the copper potential has large scale distribution, though not yet known is whether grade and tonnage combine in a world class manner. All other conditions are in place for the first Great Canadian Area Play since the Ring of Fire in 2007, and 92 Resources is uniquely positioned to benefit. Exploration VP Darren Smith, a Quebec veteran, will spearhead exploration of the copper potential of the FCI-Corvette property as well as a rethink of the gold potential of the junior’s James Bay holdings.”*

– John Kaiser, *Kaiser Research Online*

## First Vanadium Corp.

TSX.V: FVAN; OTCQX: FVANF  
▶ firstvanadium.com Phone: 604 340 7711  
Email: pcowley@firstvanadium.com

First Vanadium’s Carlin Vanadium Project Contains One of North America’s Largest Richest Primary Vanadium Deposits, located in Nevada (Source: USGC Professional Paper 1802). Its West Jerome Project Targets a Large Scale High Grade Copper and Zinc Deposit in Arizona. Advancing its intermediate-stage Vanadium Project During a Steady Vanadium Metal Price Boom. The Company’s Deep Board, Management and Tech-

nical Team's Core Competence is in Exploration, Permitting, Development, Construction, and Operation of Mining Projects in the USA, Canada and Overseas

*"Nowadays, vanadium flow batteries are not science fiction, but a real thing. With many countries seeing the need for reliable energy storage on an industrial scale to go with their renewable energy projects, we see vanadium heading higher. These batteries use a lot of metal. We see Cornerstone (now called First Vanadium) as a perfect candidate to benefit. It's worth stressing that this is a bet on a powerful trend—not a science project. Shares are not as cheap as they were a year ago, but the company has delivered strong drill results validating the project. And we like the zinc and silver linings."*

– *Dave Forest, The International Speculator*

## Radisson Mining Resources Inc.

TSX-V: RDS ▶ [radissonmining.com/en](http://radissonmining.com/en)

Phone: 819 277-6578 Email: [mbouchard@radissonmining.com](mailto:mbouchard@radissonmining.com)

Radisson is a Quebec-based gold exploration company. The O'Brien project, cut by the world renowned Larder-Lake-Cadillac Break, is Radisson's flagship project. The project hosts the former O'Brien Mine, considered to have been the Abitibi Greenstone Belt's highest-grade gold producer during its production (1,197,147 metric tons at 15.25 g/t Au for 587,121 ounces of gold from 1926 to 1957; InnovExplo, May 2018). Radisson generates value for its shareholder through the acquisition, exploration and development of mining projects in a sustainable manner. Radisson is pursuing the advanced exploration of the O'Brien project.

*"Radisson Mining Resources is exploring and expanding the high-grade O'Brien Gold Project in Quebec located along the prolific Larder-Lake-Cadillac Break. The company has an indicated resource of 233,491 ounces grading 6.45 g/t and 194,084 inferred ounces grading 5.22 g/t. An updated resource is scheduled for the near future from recent drill data and there are a number of additional exploration targets along strike that should lead to additional high grade underground ounces. Relatively low exploration risk combined with the existence of hungry mills located in this area of well-endowed infrastructure and the company's current market cap make this a very attractive speculation."*

– *Jay Taylor, J. Taylor's Gold, Energy & Tech Stocks*

## StrikePoint Gold Inc.

TSX-V: SKP ▶ [strikepointgold.com](http://strikepointgold.com)

Phone: 604 602 1440 Email: [sk@strikepointgold.com](mailto:sk@strikepointgold.com)

**STRIKEPOINTGOLD**  
TSX.V: SKP | OTC: STKXF

Members of the StrikePoint Gold management team have a successful

track record as managers and directors in companies who have discovered and funded the development of economic ore deposits for new gold or gold-associated deposits. StrikePoint explores in mining-friendly jurisdictions within North America to discover large footprint ore deposits of gold, silver and/or copper. StrikePoint Gold acquires new projects for evaluation based on sophisticated evaluation metrics. The management team uses cost-effective exploration methods to maximize the early stage evaluation of potential deposits. Exploration methods used by StrikePoint include using new technology in tandem with traditional geochemical and geophysical techniques such as LiDAR and satellite based remote sensing techniques.

*"Strikepoint Gold is involved in the exploration and development of gold and silver projects in British Columbia. It has two advanced stage high-grade projects. The Willoughby property is a high-grade gold-silver target with several hundred meters of underground workings and mineralization defined over a 1 km strike and remains open on all sides. The Porter-Idaho Mine, adjacent to Stewart B.C. is former high-grade silver mine that also has underground workings and a historical resource of 11 million ounces grading 868 g/t silver. It brings with it depth potential and excellent exploration potential from surrounding targets. The company also has some very appealing targets in the Yukon. It has a miniscule market cap and a very tight share structure with 30% owned by institutions, 12% by Ascot Resources, 8% by Skeena Resources, 8% by Eric Sprott, 12% by management, and 30% by retail."*

– *Jay Taylor, J. Taylor's Gold, Energy & Tech Stocks*

## Rise Gold Corp.

CSE: RISE; OTC: RYES ▶ [risegoldcorp.com](http://risegoldcorp.com)

Phone: 604 260 4577 Email: [info@risegoldcorp.com](mailto:info@risegoldcorp.com)

**RISE GOLD CORP**

Rise owns the past producing Idaho-Maryland Gold Mine located near Grass Valley, California USA. Idaho-Maryland is a major past producing high grade gold mine. It produced a total of 2,414,000 oz gold with an average mill head grade of 0.50oz/ton (~17g/t).

It was producing up to 129,000 oz gold per year before being forced to shut down by the U.S. government in 1942. In 1940 the United States Geological Survey was denied access to the mine. The full details of the geology, mine workings, and exploration discoveries of this major gold deposit have never been published from the mine. Please check the Rise Gold

website frequently as they will be updating shareholders with news releases, maps, photos and descriptions on the Idaho-Maryland Gold project.

*“Rise Gold is developing the high-grade underground Idaho-Maryland gold mine in Nevada County, California. The mine produced 2.4 million ounces from a vertical distance of 475 meters but until Rise began working to put this project back in production, no drilling had taken place beneath the lowest level mined when the mine was shut down by war time decree in 1944. Now similar grades have been established to a depth 1,000 meters below the old workings with grades like 22.4 g/t over 5.2 meters, 23.7 g/t over 4.5 meters, and 10.9 g/t over 2.9 meters. The mine produced 2,414,000 ounces of gold from material grading 17 g/t gold. It is located on private land in a mining jurisdiction in California. With all major veins open for exploration at depth, a resource of over one million high-grade ounces, a production capable management headed by mining engineer Ben Mossman and the technical advantages of major shareholder Yamana, Rise Gold deserves more recognition.”*

– Jay Taylor, J. Taylor’s Gold, Energy & Tech Stocks

## GFG Resources Inc.

TSX-V:GFG; OTCQB: GFGSF ▶ gfgresources.com  
Phone: 306 931 0930 Email: info@gfgresources.com

GFG Resources Inc. is a new North American focused precious metals exploration company with a strong portfolio of highly prospective district scale gold projects in tier I mining jurisdictions, Wyoming and Ontario. Our Company is led by a highly experienced management team and board with a track record of success. Our mission is to aggressively advance district scale gold projects by maximizing capital in the ground to create shareholder value.

*“GFG Resources has two very impressive gold projects that are being actively explored. A staged option has been offered to Newcrest for the Rattlesnake Hills Gold project in Wyoming under which Newcrest would be required to spend nearly as much as US\$97.85 million and/or deliver a bankable feasibility study. GFG is actively exploring its Pen Gold Project in West Timmins where little exploration attention was given in the past despite some highly promising drill intercepts that were never followed up. The Pen Gold project as well as a second earlier stage target, the Dore Gold project, are surrounded by household name operators like Newmont/Goldcorp, IAMGOLD, Pan American Silver & Alamos Gold. With Rattlesnake Hills being a large deep porphyry target, management plans to apply limited resources to explore the exciting Pen Gold prospect.”*

– Jay Taylor, J. Taylor’s Gold, Energy & Tech Stocks

## Goldsource Mines Inc.

TSX-V:GXS ▶ goldsourcemines.com  
Phone: 604 694 1760 Email: info@goldsourcemines.com

Goldsource Mines Inc. is a Canadian resource company that is currently in the Proof of Concept Phase at its 100%-owned Eagle Mountain Gold Project, located in Guyana. Goldsource is led by an experienced management team, proven in making exploration discoveries and achieving project construction on time and on-budget.

*“Goldsource Mines has been exploring and developing the Eagle Mountain project in Guyana over the past few years. Prior attempts at production on a small scale from surface saprolite material fell short due to poor recoveries using gravity. High recoveries using gravity plus CIL have been demonstrated. To need to justify capital requirements for a CIL facility led management to expand exploration. This resulted in a new high-grade surface discovery of both saprolite and fresh rock material that has been a game changer for the company. The company is now attracting serious attention from financiers and larger scale miners. With highly successful mine engineer Eric Fier providing assistance to management and with positive economic factors in play, Goldsource has been a favorite of J Taylor’s Gold Energy & Tech Stocks.”*

– Jay Taylor, J. Taylor’s Gold, Energy & Tech Stocks

## Nighthawk Gold Corp.

TSX: NHK; OTCQX: MIMZF ▶ nighthawkgold.com  
Phone: 647 794 4362 Email: info@nighthawkgold.com

Nighthawk Gold Corp. is a Canadian-based gold exploration company with a district scale land position (222,203 acres or 900 km<sup>2</sup>), within the Indin Lake Greenstone Belt, located approximately 200 km north of Yellowknife, Northwest Territories. Nighthawk is focused on advancing the Colomac Gold Project with a recently updated inferred resource of 2.6 million ounces of gold (50.3 million tonnes at an average grade of 1.62 gpt Au, see Resource Estimate), as well as advancing its other regional gold deposits and showings on its Indin Lake Gold Property, within a highly prospective and underexplored Archean gold camp.

*“With over 2 million oz. of open pittable gold at one deposit surrounded by high-grade zones and prospects, all within a huge land package covering an Archean greenstone belt in the Northwest Territories that has seen little exploration, Nighthawk gold offers fundamental value and clear opportunity for exploration excitement. And major gold companies are watching, as they also want projects offering defined ounces and ample exploration upside.”*

– Gwen Preston, Resource Maven

---

## Tinka Resources Ltd.

TSX-V: TK      ▶ tinkaresources.com  
Phone: 416 884 3556    Email: rbruggeman@tinkaresources.com

Tinka Resources Ltd. is a junior exploration company based in Vancouver, Canada, that is developing its 100%-owned Ayawilca project.

The 150 square kilometre project is located 40 km northwest of Cerro de Pasco in the richly mineralized silver-lead-zinc belt of Central Peru.

*"Tinka's Ayawilca project in Peru is one of the largest high-grade zinc deposits owned by a junior company and a first-pass mine plan due out shortly should demonstrate that this asset would make good sense to build as it stands today. That means (1) any addition high-grade tonnes that Tinka finds directly add value and (2) zinc majors will pay attention, as Ayawilca is also one of only a few zinc projects moving towards development."*

– *Gwen Preston, Resource Maven*

---

## IsoEnergy Ltd.

TSX-V: ISO      ▶ isoenergy.ca  
Phone: 778 379 3211

IsoEnergy holds 13 strategically located and prospective assets in the eastern Athabasca Basin, with Larocque East,

Geiger, Thorburn Lake and Radio being the highest priority properties. IsoEnergy's first drill hole at Larocque East intersected a new zone of strong radioactivity in July 2018. The property covers a 15-kilometre-long portion of the well mineralized Larocque conductor trend. Larocque East is located immediately north of the Geiger property. The Geiger property hosts high grade basement hosted uranium mineralization up to 2.74% U<sub>3</sub>O<sub>8</sub> over 1.2 metres and is located within 20 kilometres of the McClean Lake uranium mill.

*"IsoEnergy is onto a new, high-grade uranium discovery in the Athabasca Basin. With 12 holes completed the zone is starting to look similar to high-grade Athabasca deposits; it just needs to get bigger and Iso will work to do just that by stepping east in its next drill program. Iso counts NexGen Energy and Cameco as shareholders and is one of the only companies in the world announcing high-grade uranium discovery holes into a market increasingly short on uranium."*
